

Manufacturer of chemical products
for the construction industry

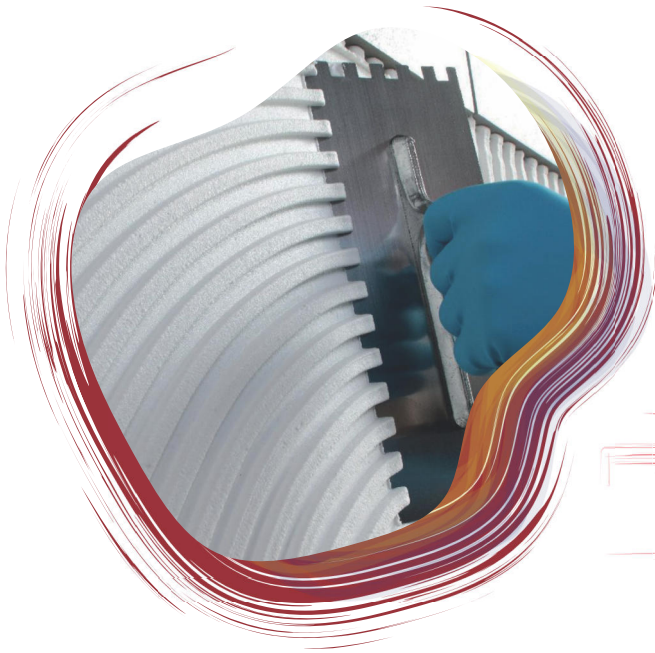

Bidak Nano Structure
Chemical Industries

Quality Never Goes Out of Style...

Bidak Nano Structure Chemical Industries Company has been active since 2017 in producing a wide range of chemical products for the construction industry, including ready-mixed and powder tile adhesives, building waterproof coatings, and specialty sprays. The company is recognized for its advanced technology and innovation in material science. Bidak develops products based on the latest scientific research, engineered to meet international quality standards and compete with global brands.

TILE ADHESIVE TN3000

The TN3000 Porcelain Powder Tile Adhesive, with high flexibility and exceptional adhesion, simplifies the installation of large and medium-sized porcelain and slab tiles on horizontal and vertical surfaces, both indoors and outdoors. This waterproof, fiber-reinforced product is based on nanotechnology and is compliant with EN 12004 standard, classified as C2TES1.

Application: For bonding all types of slab, pool, and large or medium-sized porcelain tiles, as well as standard tiles, on various horizontal and vertical surfaces indoors and outdoors.

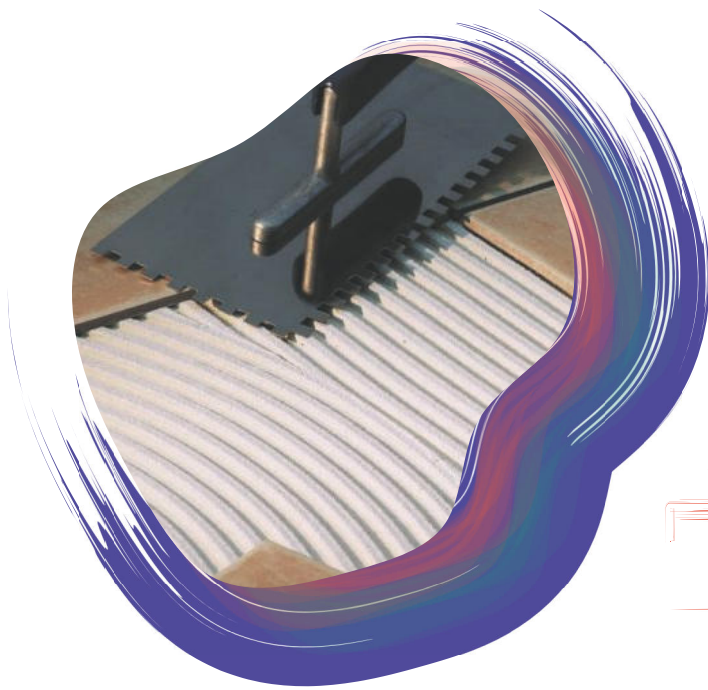

Features: High flexibility, high strength, open time over 30 minutes, nanotechnology-based, waterproof, fiber-reinforced, compliant with EN 12004 (C2TES1).

Packaging: 20 kg bag

Physical Form: Powder

Color: White

TILE ADHESIVE TN1000

The TN1000 White Porcelain Powder Tile Adhesive, with high strength and strong adhesion, facilitates the installation of large and medium-sized porcelain tiles on horizontal and vertical surfaces, both indoors and outdoors. This waterproof, fiber-reinforced product is based on nanotechnology and is compliant with EN 12004 standard, classified as C1.

Application: For bonding all types of large and medium-sized porcelain and standard tiles on various horizontal and vertical surfaces indoors and outdoors.

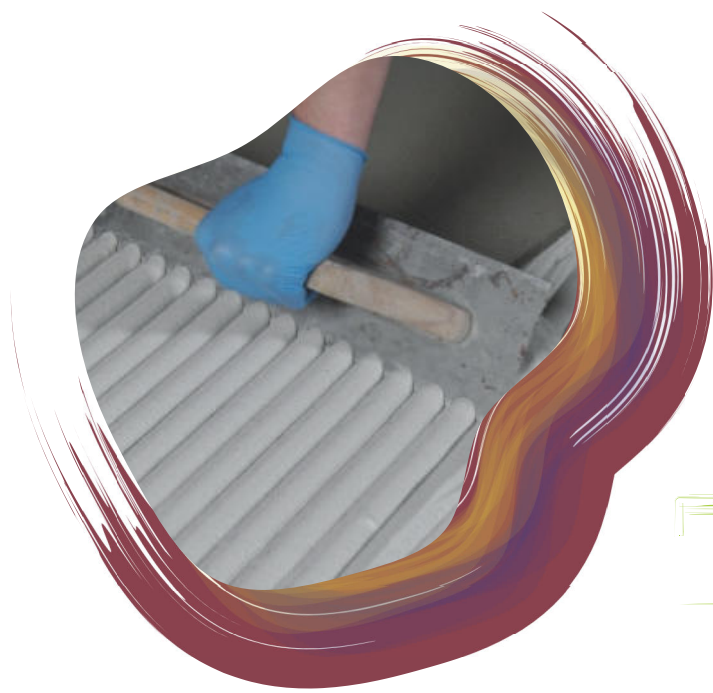

Features: High strength, open time over 20 minutes, nanotechnology-based, waterproof, fiber-reinforced, compliant with EN 12004 (C1).

Packaging: 20 kg bag

Physical Form: Powder

Color: White

TILE ADHESIVE TN1000

The TN1000 Gray Porcelain Powder Tile Adhesive offers high strength and excellent adhesion at an affordable price, making it ideal for installing large and medium-sized porcelain tiles as well as standard tiles on horizontal and vertical surfaces, both indoors and outdoors. This waterproof, fiber-reinforced adhesive is based on nanotechnology and is compliant with EN 12004 standard, classified as C1.

Application: For bonding all types of large and medium-sized porcelain and standard tiles on various horizontal and vertical surfaces indoors and outdoors.

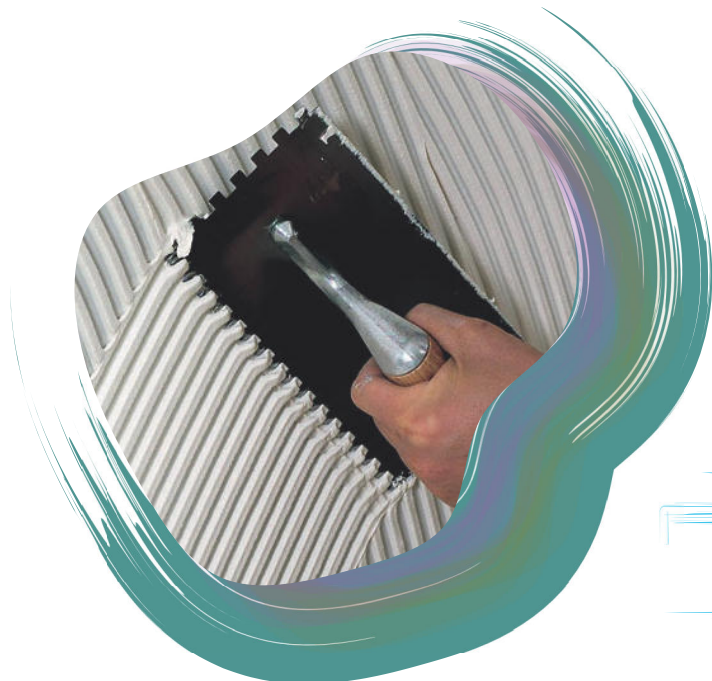

Features: High strength, open time over 20 minutes, nanotechnology-based, waterproof, fiber-reinforced, compliant with EN 12004 (C1)

Packaging: 20 kg bag

Physical Form: Powder

Color: Gray

TILE ADHESIVE TN800

The TN800 Porcelain Powder Tile Adhesive is suitable for installing medium and small-sized porcelain tiles as well as standard tiles on horizontal and vertical surfaces, both indoors and outdoors. This waterproof, fiber-reinforced adhesive is based on nanotechnology, offering high strength and an open time of over 20 minutes. It is compliant with EN 12004 standard, classified as C1.

Application: For bonding all types of medium and small-sized porcelain and standard tiles on various horizontal and vertical surfaces indoors and outdoors.

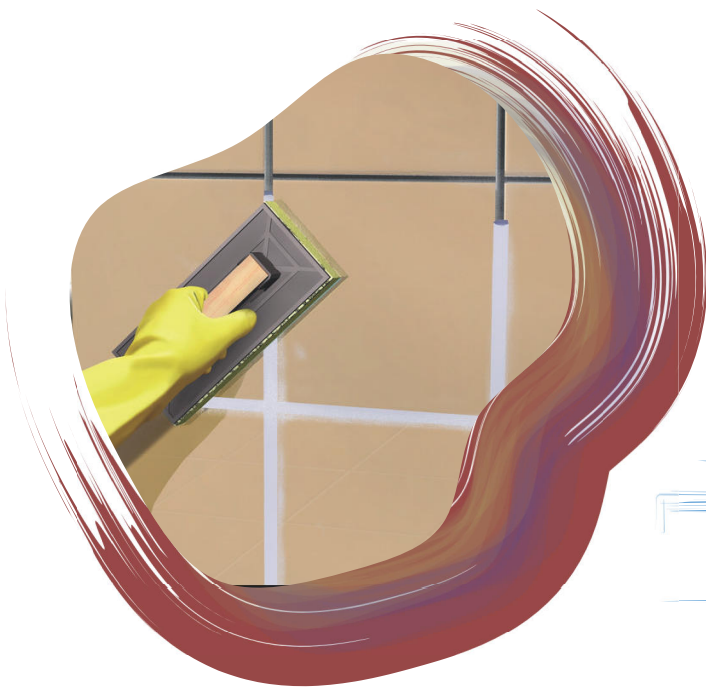

Features: High strength, open time over 20 minutes, nanotechnology-based, waterproof, fiber-reinforced, compliant with EN 12004 (C1).

Packaging: 20 kg bag

Physical Form: Powder

Color: White

BN200 Grout Powder

Bidak Grout Powder is produced using nanotechnology and is ready to use simply by adding water. With high strength, long-lasting durability, and excellent resistance, it prevents early cracking or emptying of joints.

Application: For grouting between tile, ceramic, and stone surfaces on various horizontal and vertical areas indoors and outdoors.

Features: High adhesion, nanotechnology-based, waterproof, fully formulated, no need for additional additives.

Packaging: 4 kg and 2 kg bags, 400 g container

Physical Form: Powder

Color: White

**READY
TO USE MORTAR**

Bidak Thin-Layer Block Adhesive, formulated with a special composition, is the ideal choice for bonding various types of cement, AAC, and lightweight blocks. This fiber-reinforced adhesive offers excellent adhesion and a smooth texture, ensuring fast, strong, and durable application. The product is compliant with EN 706 standard.

Application: Suitable for bonding all types of cement, AAC, and lightweight blocks.

Features: Excellent adhesion, smooth texture, fiber-reinforced, compliant with EN 706.

Packaging: 20 kg bag

Physical Form: Powder

Color: White and Gray

SEALING INSULATION B100

The B100 Waterproofing Resin is a water-based product formulated with advanced acrylic resin technology, ideal for sealing roofs, pools, fountains, and bathrooms. It creates a transparent, waterproof, and flexible coating that is highly resistant to UV radiation and prevents water penetration and surface damage through excellent adhesion.

Application: Suitable for waterproofing roofs, pools, fountains, bathroom and toilet floors.

Features: Creates a transparent, waterproof, and flexible coating; highly UV-resistant; excellent adhesion.

Packaging: 1-liter bottle, 20 and 10-liter container

Physical Form: Liquid

Color: White

CONCRETER ADHESIVE RD1200

Bidak Concrete Adhesive RD1200, with its advanced formulation, reduces concrete permeability and enhances its resistance to freezing. This product significantly increases the adhesion of cement mortars. With optimal viscosity and a high solid content, it is a cost-effective choice for durable and long-lasting construction.

Application: Reduces concrete permeability, improves concrete resistance to freezing, enhances cement mortar adhesion.

Features: Thick and economical, high solid content.

Packaging: 3 kg and 1 kg pails

Physical Form: Liquid

Color: White
